AGRICULTURAL EXPORTS OF THE UNITED STATES, BY COUNTRIES, 1895-1899.

INTRODUCTION.

The present bulletin comprises a series of statistical tables designed to show at a glance the extent and character of the agricultural export trade carried on by the United States with the several foreign countries. Following the general summaries that appear on the first few pages of the report will be found a separate table for every country of destination, the principal agricultural exports to each destination being arranged in the order of their average annual value for the five fiscal years 1895-1899. The statistical statements presented are in every instance based on the official returns¹ of exportation.

PRINCIPAL FOREIGN MARKETS FOR AMERICAN FARM PRODUCTS.

During the period covered by the five fiscal years 1895-1899 the United States exported nearly three and a half billion dollars' worth of domestic agricultural produce. The average annual value reached \$694,874,000.

Of these exports about 88 per cent went to European countries. Our leading market, the United Kingdom, received 53.4 per cent, or nearly four times the amount sent to Germany, which ranked next in importance. Germany's share was 13.6 per cent. France took 6.2 per cent, or less than half as much as Germany. The Netherlands received 4.7 per cent, Belgium 3.8 per cent, Italy 2.3 per cent, Spain 1.3 per cent, and Denmark 1.1 per cent.

The largest market outside of Europe was afforded by Canada, that country taking 3.6 per cent. Important sales were also made to Cuba, Brazil, Japan, British Africa, British West Indies, Mexico, and Hongkong.

The only other countries to which the United States sent agricultural exports during 1895-1899 having an average annual value in excess of \$1,000,000 were Sweden and Norway, European Russia, Austria-Hungary, Portugal, British Australasia, Haiti, Venezuela, Hawaiian Islands, British Guiana, Porto Rico, and the French West Indies.

¹The statistics given in the present bulletin are all based on the official export returns published by the Bureau of Statistics, Treasury Department, in its annual reports on the Commerce and Navigation of the United States.

CHARACTER OF AGRICULTURAL EXPORTS TO LEADING MARKETS.

UNITED KINGDOM.

To the United Kingdom we sell more farm produce than to all other countries combined. During 1895-1899 the average annual value of our agricultural exports to the British market amounted to \$370,862,-028. Breadstuffs and meat products to help feed the teeming population of the Kingdom and raw cotton to supply the English mills formed the bulk of the trade. BREADSTUFFS.

Our exports of breadstuffs during 1895-1899 had an average yearly value of \$212,343,162, almost equaling the cotton shipments in importance. Over one-half of the breadstuffs exported during the period mentioned found a market in the United Kingdom, the consignments to that country forming 53 per cent of the total. Germany and the Netherlands furnished the markets of next importance, the former country taking 8 per cent and the latter 7.2 per cent. To Canada we shipped 5.5 per cent, to Belgium 5 per cent, to France 4.8 per cent,

and to Denmark 2.3 per cent. Brazil was credited with 1.7 per cent, British Africa with 1.5 per cent, Hongkong with 1.5 per cent, and the British West Indies with 1.4 per cent.

The following table shows in full the distribution of our exports of breadstuffs during 1895-1899:

MEAT PRODUCTS.

The meat products sent abroad during 1895-1899 amounted in average annual value to \$141,501,091. Of these exports the United Kingdom took 61 per cent, far exceeding all other countries in the extent of its requirements. After the United Kingdom, Germany was our most important market, purchasing 12 per cent of the total shipments. The Netherlands received 7.4 per cent, Belgium 4.4 per cent, and France 2.3 per cent. To Cuba we shipped 1.9 per cent, to Canada 1.7 per cent, to Brazil 1.5 per cent, and to Sweden and Norway 1.2 per cent.

VEGETABLE OILS.

Vegetable oils were marketed abroad during 1895-1899 to the average yearly value of \$9,555,831. France took the largest share, the shipments to that country forming 26 per cent of the total. The Netherlands afforded the second market in importance, taking 19 per cent. The United Kingdom stood third with 11 per cent, Germany fourth with 10 per cent, and Austria-Hungary fifth with 7.8 per cent. To Italy we exported 5 per cent, to Belgium 4.8 per cent, to Mexico 4.2 per cent, to Brazil 2.1 per cent, to Canada 1.8 per cent, and to French Africa 1.5 per cent.

The distribution of the vegetable oils exported during 1895-1899 is shown in detail by the following table:

DAIRY PRODUCTS.

The dairy products exported from the United States during 1895-1899 had an average annual value of \$7,862,358. Nearly two-thirds of our total shipments went to the United Kingdom, that country being credited with 65 per cent. Next to the United Kingdom, Canada was our most important market, taking 14 per cent. To the British West Indies we shipped 2.6 per cent, to Cuba, 2.4 per cent, and to Germany, 2 per cent. Denmark took 1.8 per cent, Haiti 1.2 per cent, Brazil 1.1 per cent, Venezuela 1.1 per cent, and Japan 1 per cent.

Detailed statistics as to the distribution of our shipments of dairy produce during 1895-1899 are presented in the following table:

FRUITS AND NUTS.

Our exports of fruits and nuts during 1895-1899 amounted in average yearly value to \$7,060,191. The United Kingdom, Canada, and Germany afforded the principal markets. To the United Kingdom we shipped 44 per cent of the total, to Canada 14 per cent, and to Germany 13 per cent. The remaining exports went chiefly to the Netherlands, France, Belgium, and British Australasia. The Netherlands took 7.7 per cent, France 5.7 per cent, Belgium 4.4 per cent, and British Australasia 3.5 per cent.

The following table gives the distribution by countries of our exports of fruits and nuts for 1895-1899:

SEEDS.

Seeds were exported during 1895-1899 to the average annual value of \$3,700,743. The shipments were marketed chiefly in the United Kingdom, Canada, Germany, and the Netherlands. The United Kingdom took 36 per cent of the total, Canada 20 per cent, Germany 18 per cent, and the Netherlands 14 per cent. To Belgium we sent 5.9 per cent, to France 1.5 per cent, to British Australasia 1.3 per cent, and to Denmark 1.1 per cent.

Following is a detailed statement, by countries, of our seed exports for 1895-1899:

AGRICULTURAL EXPORTS, BY COUNTRIES.

On the following pages will be found a series of tables showing in some detail the character and value of our agricultural export trade during 1895-1899 with the several foreign countries. The exports to each country have been compiled in a separate table, the articles¹ being arranged in the order of their average annual value for the five years. An alphabetical index to the countries covered by the tables is printed on pages 87-88. The tables are as follows:
